

How to Install IntelliJ!

On the University Ubuntu Linux Machines

Initialising:

- Open the BASH terminal
- Use command “ls”
- “cd Downloads”
- “mkdir IntelliJ”
- Verify it’s worked with “ls”

Downloading:

- Open Firefox
- <https://www.jetbrains.com/idea/download/?section=linux>
- Download COMMUNITY EDITION
- Download the .tar.gz file

Move to our IntelliJ directory

- Use “ls” to find the file name
- (Usually idealC-2024.3.3.tar.gz)
- “mv idealC-2024.3.3.tar.gz intelliJ”

Extracting

- “cd IntelliJ”
- “tar -xvzf idea-IC-243.24978.46.tar.gz”
- “ls”

Running IntelliJ

- cd to the newly extracted folder
- ls -> cd another layer in
- ls -> “cd bin”
- ./idea.sh

IntelliJ is live

- Congratulations!
- IntelliJ is now running
- You can ignore all pop up notices, except “JDK17 not configured -> Respond to this by installing Amazon Corretta JDK 17

DON'T MAKE A NEW PROJECT

- We are going to clone from VCS
- “Clone from Version Control”
- As URL: <https://github.com/swacksoc/Chess-game>
